UCONNECT™ HANDS FREE COMMUNICATION SYSTEM

Description

The Chrysler Group UConnect™ Hands Free Communication system uses Bluetooth® technology – the global standard that enables different electronic devices to connect to one another without wires or a docking station. With one touch of a button, UConnect provides short-range wireless communication between the customer's compatible mobile phone and the vehicle's onboard receiver, no matter where the mobile phone is stored – be it a purse, pocket or briefcase. Voice commands are used in the operation of the system. UConnect allows consumers the choice of any carrier's Bluetooth phone.

The Chrysler Group was the first North American automaker to offer its customers a Bluetooth-enabled automotive application in 2003. The first product to offer UConnect as a factory-installed option was the 2004 Chrysler Pacifica.

Advanced voice-recognition technology controls UConnect operation. The incoming voice is broadcast through the vehicle's radio speakers, automatically muting other audio signals on the front speakers when the hands-free system is in use. A dual-element microphone within the rearview mirror picks up the vehicle-occupant's voice while canceling out background noise.

Two control buttons located on the MyGIG multimedia head unit allow the user to access the intuitive system. The phone icon button activates the system and disconnects calls. The voice-recognition icon button just above it can be pushed at any time to end the voice prompt in process and allow voice commands. The radio display shows visual information from the UConnect system, such as caller ID.

UConnect features the following:

- Voice dialing – voice commands can be used to digit-dial the phone or access pre-stored voice tags
- Audio address book – enables customers to store up to 32 names and four

numbers per name, for a total of 128 phone numbers

- Audio-system mute – mutes the microphone for privacy
- Call transfer – allows the customer to transfer a call from the vehicle's communication system to the mobile phone
- Communicates in three languages – English, French and Spanish
- Multiphone recognition – up to seven phones can be paired with one vehicle

Customer Benefit

UConnect provides hands-free wireless communication using the customer's compatible mobile phone and the vehicle's onboard receiver.

UConnect can transfer calls between the customer's wireless phone and the in-car system as the customer enters or exits the vehicle, and allows for the system's microphone to be muted for a private conversation.

Availability

Starting with the launch of the 2004 Chrysler Pacifica, Chrysler Group now offers UConnect on the following 2007 models:

- Chrysler 300, Aspen, Pacifica, PT Cruiser, Sebring and Town & Country minivan
- Dodge Caliber, Caravan minivan, Charger, Dakota, Durango, Magnum, Nitro, Ram and Stratus
- Jeep® Commander, Compass, Grand Cherokee, Liberty, Patriot and Wrangler

Price

UConnect factory installation is $275 and requires no additional subscription fees. UConnect also is available as a dealer-installed option for $299 (suggested retail price) plus labor. Dealer installation is available on all Chrysler, Dodge and Jeep vehicles back to 1994 except Jeep Wrangler and Chrysler Sebring Convertible and Chrysler Crossfire.

UConnect Hands Free Communication System User Guide

If assistance is needed at any prompt or to learn what the options are, say **Help** following the voice or beep, and the system will offer guidance.

Linking to UConnect – Required for First-time Use of Each Mobile Phone
To complete the pairing process, the mobile-phone owner's manual will need to be referenced. One of the following vehicle-specific Web sites will also provide detailed instructions for pairing with the phone: www.chrysler.com/uconnect, www.dodge.com/uconnect and www.jeep.com/uconnect.

- Press the **Phone** icon button to begin
    - After the Ready prompt and subsequent beep, say **Set Up Phone Pairing**
- When prompted, after the voice or beep, say **Pair a Phone**
- You will be asked to say a four-digit PIN that will be needed later to enter into your mobile phone. You can use any four-digit PIN. You will not need to remember the PIN after the initial pairing process
- For identification purposes, you will be prompted to give the UConnect system a name for your mobile phone. Each mobile phone that is being paired should be given a unique phone name
- You then will be asked to give your mobile phone a priority level between one and seven, one being highest priority. The priority allows the UConnect system to know which mobile phone to use if multiple mobile phones are in the vehicle at the same time

Making a Phone Call

- Press the **Phone** icon button to begin
- After the Ready prompt, say **Dial**
- The system will prompt you to say the number you wish to dial

Making a Phone Call Using Your UConnect Phonebook

- Press the **Phone** icon button to begin
- After the Ready prompt, say **Call** followed by the name and designation of a phonebook entry you wish to dial – for example **Call**, then **John Doe**, then **Work**

Terminating a Phone Call

To end a call in progress, press the **Phone** icon button. All calls in progress will be terminated.

Phone Redial

- Press the **Phone** icon button to begin
- After the Ready prompt, say **Redial**
- The UConnect system will call the last number that was dialed on your mobile phone. This may not be the last number dialed by the UConnect system

Answering or Rejecting an Incoming Call - No Call Currently in Progress

When you receive a call on your mobile phone, the UConnect system will interrupt the stereo audio to ask if you would like to answer the call. Press the **Phone** icon button to answer the call. To reject the call, press the **Phone** icon button until you hear a single beep indicating that the incoming call was rejected.

Answering or Rejecting an Incoming Call - Call Currently in Progress

If a call is currently in progress and you have another incoming call, press the **Phone** icon button to place the current call on hold and answer the incoming call. To reject the incoming call, you simply can ignore it and continue with your current conversation.

Adding Names to Your UConnect Phonebook

- Press the **Phone** icon button to begin
- After the Ready prompt, say **Phonebook**, **New Entry**
- When prompted, say the name of the new entry
- Next, enter the designation for this phone number – for example **Home**, **Work**, **Mobile** or **Pager** – this will allow you to have multiple numbers for each phonebook entry
- Say the phone number for the phonebook entry that you are adding
- The UConnect system will allow you to enter up to 32 names into the phonebook with each name having up to four associated phone numbers and designations

Listing All Names in the UConnect Phonebook

- Press the **Phone** icon button to begin
- After the Ready prompt, say **Phonebook**, **List Names**
- The UConnect system will play the names of all the phonebook entries
- To call one of the names in the list, press the **Voice Recognition** icon button during the playing of the desired name and say **Call**
- The UConnect system will then prompt you as to the number designation you wish to call

Making a Second Call while Current Call in Progress

To make a second call while you are currently on a call, press the **Voice Recognition** icon button and say **Dial** or **Call** followed by the phone number or phonebook entry you wish to call. The first call will be on hold while the second call is in progress.

Putting a Call on Hold and Retrieving a Call from Hold

To put a call on hold, press and hold the **Phone** icon button until you hear a single beep which will indicate that the call has been placed on hold. To bring the call back from hold, press the **Phone** icon button again.

Toggling Between Two Calls

If two calls are in progress (one active and one on hold), press the **Phone** icon button until you hear a single beep indicating that the status of the active and hold calls has switched. Only one call can be placed on hold at a time.

Conference Call

When two calls are in progress (one active and one on hold), press the **Phone** icon button until you hear a double beep indicating that the two calls have been joined into one conference call.

Emergency Assistance

If you are in an emergency situation, press the **Phone** icon button and say **Dial Emergency** or **Call Emergency** and the UConnect system will instruct your mobile phone to call 911.
